

Intent

Our Geography curriculum is designed to develop children's curiosity and fascination about the world and the people that live in it. Children investigate a range of places, both in Britain and abroad, to help develop their knowledge and understanding of the Earth's physical and human processes. We are committed to providing children with opportunities to investigate and make enquiries about their local area of Blackwell, Derbyshire so that they can develop a real sense of who they are, their heritage and what makes our local area unique and special. We also develop the children's ability to apply geographical skills to enable them to confidently communicate their findings and geographical understanding to a range of audiences.

Through high quality teaching, we develop the following essential characteristics of geographers:

- An excellent knowledge of where places are and what they are like, both in Britain and the wider world
- An understanding of the ways in which places are interdependent and interconnected
- An extensive base of geographical knowledge and vocabulary
- Fluency in geographical enquiry and the ability to reach clear conclusions and explain their findings
- Excellent fieldwork skills
- A genuine interest in the subject and a real sense of curiosity about the world and the people who live here

Implementation

In Geography pupils develop their knowledge of people and places to understand the physical, social and economic forces which shape those places and the lifestyles of the people who live there. We study local areas/issues and extend these studies into the wider world. The children learn to use maps to locate cities, countries, mountain ranges, rivers, seas and oceans. They use atlases, photos and the internet to explore the environment and economics of those countries which they study. They then use the skills they have developed in English, Maths and Computing to report and record their findings.

Impact

Children will have developed the geographical knowledge and skills to help them explore, navigate and understand the world around them and their place in it. Children's knowledge and skills will develop progressively as they move through the school, not only to enable them to meet the requirements of the National Curriculum, but to prepare them to become competent geographers in secondary education.
